Too many fishermen, who travel into Ontario's bush country, do so for limits of fish and fail to soak up the blessings of nature's environment. Catching fish is a strong part of any fly-in vacation but so is the peace and quiet of this undisturbed world of nature.

How-To Fishing Tips

- Samuelson has produced many a large northern. First lure choice would be a daredevil spoon in orange fluorescent stripes. #2 would be a black bass spinner bait with orange blades. For walleye use a bottom walking sinker (Bait-Walker), 24 inch dropback line and live or frozen minnows on a #2 short shanked hook. Sinker weight should be 1 oz. Yellow hair jigs tipped with meat will also work on walleye...use 1/4 or 3/8 oz.

Walleye anglers might consider taking along an assortment of pork rind in jars. Try some of the new yellow, purples, red as well as white jigs.
